Hamza Temsamani

Software Engineer — Internship Candidate

Tanger, Morocco | hamzatemsamani1308@gmail.com | +212 689 766 041 | linkedin.com/in/temsamani-hamza | github.com/TemsamaniHamza

PROFESSIONAL SUMMARY

Software engineering student at 1337 (42 Network) with hands-on experience building backend APIs, real-time systems, and data pipelines. Independently built and deployed a full-stack job aggregation tool that fetches, deduplicates, and exposes 1,000+ job postings via a REST API. Comfortable working across the stack from PostgreSQL schemas to React dashboards, with a focus on clean architecture and data quality.

PROJECTS

AI Career Coach Platform *Next.js, Prisma, PostgreSQL, Gemini AI, TailwindCSS*

- Built a full-stack AI-powered career coaching platform with authentication, resume generation, interview preparation, and industry insights features.
- Designed and integrated a **PostgreSQL database schema** using Prisma ORM for user profiles, resumes, assessments, and analytics data.
- Integrated **Gemini AI APIs** to generate personalized resumes, career recommendations, and mock interview content dynamically.
- Developed a responsive frontend with **Next.js, TailwindCSS, and Shadcn UI**, focusing on clean UX and reusable components.

Real-Time Distributed Chat (ft_transcendence) *NestJS, TypeScript, WebSockets, PostgreSQL*

- Engineered a real-time chat system using **event-driven WebSockets**, supporting concurrent rooms, message history, and user presence tracking.
- Designed a **PostgreSQL schema** with indexes for message queries across 10+ simultaneous rooms without degradation.
- Implemented **JWT authentication and session management** in a NestJS TypeScript backend with role-based room access control.

Netflix Content Insights Engine *Python, Pandas, Streamlit, Plotly*

- Analyzed **8,800+ entries** from the Netflix catalog to surface content trends by country, genre, and release year using Pandas.
- Built an **interactive Streamlit dashboard** with multi-dimensional filtering and Plotly charts; identified that **60% of content added post-2017** was international, supporting a data-driven narrative.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript / TypeScript, C, C++
- **Backend:** FastAPI, NestJS, Express.js — REST APIs, WebSockets, JWT auth
- **Databases:** PostgreSQL (schema design, indexing, query optimization), SQLite
- **Frontend:** React, Streamlit
- **Data:** Pandas, Plotly — data cleaning, aggregation, visualization
- **DevOps & Tools:** Docker, Docker Compose, Git / GitHub, Postman, Railway, Vercel

EDUCATION

1337 — Mohammed VI Polytechnique University *2023 – Present*

- Peer-to-peer software engineering program (42 Network); curriculum covers systems programming, networking, and software architecture through project-based learning.
- Core topics: Unix/Linux, C/C++ memory management, concurrent programming, and full-stack development.

OFPPT — Technicien Spécialisé en Développement Digital (Bac+2) *Completed*

- Foundations in web development, OOP, and relational database design.
